

ORGANIC GARDENING

GROUP - 02

Lets Go

what problems we will face and solutions for that problems, Objectives, project description, market analysis, environmental and social impact, Work plan and timetable, Budget and financial plan, Risk and mitigation plan, Monitoring and evaluation and tam profile

PROPOSAL SUMMARY

PROBLEMS & SOLUTIONS

- Limited space - Shorter and crawler plants
- Lacking organic fertilizer - Using homemade compost
- Limited time - Plants with shorter maturity period
- Unable to maintain daily - Low maintenance plants

**Very less Problems & good
solutions**

OBJECTIVES

WHAT WE WILL EXPECT?

- 
- 
- Convert empty space into productive agriculture land.
 - Get Products within 6 months.
 - Learn Marketing strategy and get experience in Gardening.
-

PROJECT DESCRIPTION

- **Location** - Backyard, Dream space, Kallady, Batticaloa.
- **Crops** - Spinach, Tomato, Watermelon.
- **Compost** - Using litter leaves and branches.
- **Infrastructure** - Compost bin, brick stage, Tool storage.
- **Farming activities** - Pest control, Intercropping, Composting.

TOOLS

- Shovel
- Hoe
- Gardening Fork
- Garden hose
- Rake
- Pruner
- Garden trowel
- Bricks for raised bed
- Protective structure

MARKET ANALYSIS

- **Target market** - Households, organic stores, urban farmer markets, veg shops.
- **Pricing Strategy** – Current Price.
- **Distribution channels** - Direct-to-consumer (D2C), online sales, local markets.
- **Competition** - Our opponent teams

Green technology is increasingly part of everyday activities.

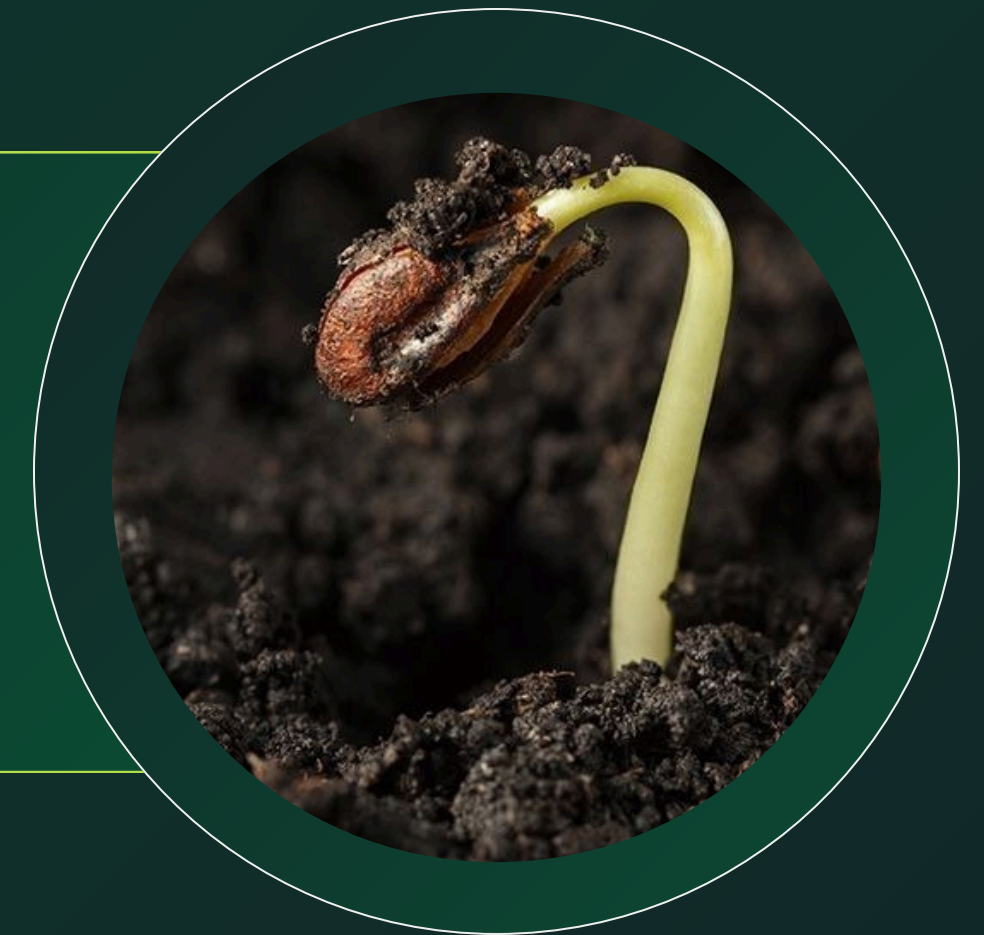

ENVIRONMENTAL & SOCIAL IMPACT

- Composting and covering crops make the soil healthy and strong.
- Using fewer chemicals protects animals, plants, and nature.
- Farmers can learn new farming skills through training programs.

WORK PLAN & TIMELINE

- Site Selection & Soil Setup - 1 day
- Compost and Amendment - 2 days
- Infrastructure setup - 3 days
- First Planting Season - 2 to 5 days
- maintain the plants - 6 months

- 
- Water Management - Drip irrigation
 - Pests - Organic pesticide
 - Nutrient Management - Natural fertilizer or compost

RISK & MITIGATION PLAN

MONITORING & EVALUATION ACTIVITIES

- Water daily
- Check growth
- Remove weeds
- Inspect Plants
- Fertilize
- Maintain pathways
- Record Activities

TEAM PROFILE

Name	Role
Pujithran	Leader
Nusrath	Co leader
Abigail	Curator
Mathushikka	Soil Executive
Abiyuth	Garden Maintainance Manager

**All team members have
experience in home gardening**

Conclusion

Regular monitoring and evaluation help improve garden management
These activities support healthy plant growth and successful garden maintenance
The plan ensures the achievement of the garden project goals
